

Notes:

This corset is cropped finishing on the waist line
has two straps that attach to back and fold over shoulder
tying to front panel by use of lacing.
Corset features full lacing at both center front and back.
This corset should be made from two layers of coutil
laid on top of each other then stitched together at
yellow dashed marks, to create boning channels for boning
the corset should then be edged with bias tape to close
open edges (remeber to insert boning first
This Corset is fully boned, not one part of this corset is just
material, insert boning into every channel.
